

AUDION SPEEDPACK HYBRID SEALER

PRODUCT DESCRIPTION

The Audion Speedpack Hybrid Sealer is a flexible packaging machine capable of labeling, filling, counting and sealing bags. It has high production capacity and a revolutionary compact 'form-fill-seal' system that can be used with continuous tubing or ready made bags on rolls. When using continuous tubing, the Speedpack Hybrid forms pouches in-line before they are filled and sealed. This ability to work with both fixed and flexible bag lengths (using layflat tubing) has an immediate positive effect on the amount of material that is required per package, resulting in considerable savings in material costs. The machine itself is highly reliable and easy to use.

PRODUCT FEATURES

- Variable bag length (layflat tubing)
- Packaging from bags on a roll also possible
- Optimal connectivity for external peripherals
- High quality and reliability (heavy-duty/peak load)
- Machine specific and user-friendly software via touchscreen on machine
- 12 month warranty
- Servicing and spare parts available

MACHINE SPECIFICATIONS

Machine Weight	190kg
Machine Size (LxWxH)	1100mm x 900mm x 1100mm
Maximum Fill Roll Width	400mm
Required Compressed Air	6 bar
Film Thickness	40 – 125 um
Phase/ Volts	230v – 1 phase
