

# Venus<sup>®</sup> best in bag sealing

Fill and seal plastic bags or make the bags as you go using tubular film. Either way your product will be secure and sparkling with sales appeal. Models, features and options? The choice is yours.

**Worktable**  
with adjustable bag holder.  
Optional with all models.

**Polylock**  
Prevents film from  
retracting. Optional  
with all models.

**Stand**  
Optional with most models.  
Includes Foot Pedal and Chain  
(Sealmaster and Magneta)

**Electric Foot Switch**  
Optional with Magneta  
Motor models.

**Rolloflux**  
Film holder with  
rollers. Optional with  
most models.  
Includes Polylock.

## Best choice of models

### Sealmaster manual hold-down

Economical impulse sealers with manual hold-down. A timer light indicates when the seal is done. Seal PE, PP, PVC and laminates up to 2 x 250 microns. (Super Sealmaster has a more efficient, angled sealing lip and seals up to 2 x 200 microns).

### Magneta magnetic hold-down

A light touch with fingertips or foot pedal is all it takes. The jaws are held closed magnetically then released automatically after the time selected on the adjustable timer. Seal PE, PP, PVC and laminates up to 2 x 150 microns. (820MG and 1020MG seal up to 2 x 200 microns)

### Magneta Motor electric powered sealing jaws

The motorised sealing jaws are closed by a gentle touch with fingertips or foot switch. A powerful magnet holds the jaws closed and releases automatically after the time selected on the adjustable timer. Seal PE, PP, PVC and laminates up to 2 x 150 microns. (MGM820 and MGM1020 seals up to 2 x 200 microns. MGMS421 seals up to 2 x 250 microns).

## Best choice of features

The "FEATURES AT A GLANCE" table below shows which features are standard on each model.

### Sliding cutter

Just a feather light touch makes simple work of trimming bags and tubular film. Cuts both ways.

### Magnetic hold-down

A powerful magnet holds the jaws closed and releases automatically after the selected time.

### Print seal

Impresses an embossed message such as "Use by" and "Batch No" into the seal area. Includes a set of type.

### Twin Double

**Twin/double seal**  
Twin: Parallel sealing bars for a stronger seal on plastic bags. One sealing bar can be turned off for sealing tubular film. Double: One sealing bar in the jaw and one in the machine provide more power for thicker films.
