

Shrink-a-Pack for a Professional Finish

If you are a business that is involved with the production and / or packaging of products for Christmas and need a versatile and economical wrapping solution, then read on. The Venus **Shrink-a-pack** system is extremely simple to use and takes no time to set up. It provides customers with a professionally finished shrink wrapped product which assists in transportation of product and presentation in retail environments.

The Venus Shrink-a-pack is widely used in food packaging as well as other applications such as gifts, paper products, toys and general merchandise. The machine can use a range of plastic films including PVC or polyolefin – our sales team can advise the right film for you. The versatility of the Shrink-a-pack means that you may have a run of small square products followed by a run of Christmas hampers and both can be easily completed with the one machine.

Benefits of the Shrink-a-pack:

- Low cost, prices start from \$324.50 (+gst) for the 300mm unit
- Comes complete with heat gun
- Can be used straight away, no heating up time
- Film, after being shrunk produces a tough tamper proof barrier
- Various different sized and shaped objects can be wrapped with the same machine
- Ideal for retail shops or small- medium sized businesses

The Venus Shrink-a-pack system is available in 5 widths, 300, 450, 600, 800 & 900mm.
