

# Venhart® Clipping Tools

BRAND

Used in the construction industry, public works and general farming for making plastic net, oyster cages, hen houses, joining protective netting for fruit trees and in vineyards for supporting vines and irrigation pipes. **Venhart** hand net clippers can also be used for closing **VENEZ** produce, citrus and oyster bags.

VHTR40 is used in vineyards to attach irrigation pipes to supporting wires.

VHFJ26 is used in vineyards to attach supporting wires to vines.

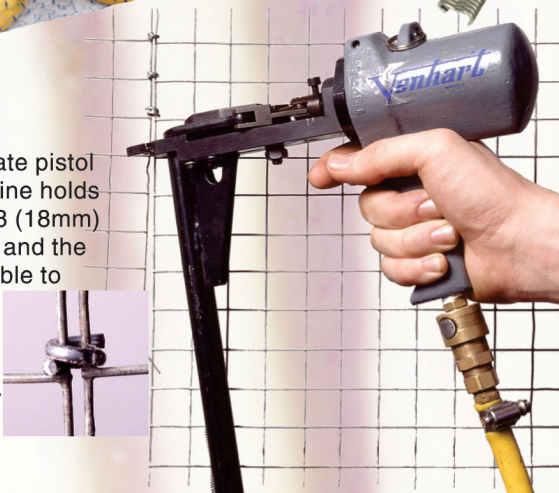

## VHTG Series

VHTG16, VHTG18 and VHTG20. Each model weighs only 360 grams and holds 50 omega shaped clips with no sharp edges. Use **Venhart** VR16 (16mm), VR18 (18mm) or VR20 (20mm) clips.

## VH60 Air Assisted

An easy to operate pistol grip. The magazine holds 75 **Venhart** VR18 (18mm) galvanised clips and the jaws are adjustable to exert a closing pressure of up to 1900kg. Air supply 90psi.

## VHTR40

For attaching irrigation pipes to supporting wire in vineyards. Uses TR40 galvanised staples.

## VHFJ18C

Designed for animal cage and greenhouse construction. Uses VR18 staples.

## VHFJ26

For attaching vines to wire supports. Uses FJ26 galvanised staples.

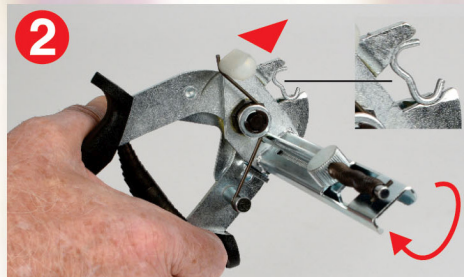

## VHA40

For making animal cages. Uses A40 galvanised staples.

Press the VHGM18V trigger to load a staple.

After a staple is loaded the loader rotates away from the jaws and staple.

## VHGM18V

For making animal cages. After each staple is loaded the loader rotates out of the way for better access. (See action images at left.) Uses VR18 staples.

The jaws and staple now have easy access to the job. A light pressure closes the staple.
