

SMALL BUSINESS TAX BREAK

Get in Quick before June 30th 2018

Most of our small business customers will already be aware of the Federal Government Tax scheme which gives businesses turning over less than \$10 million the ability to instantly write-off specified equipment purchases valued below \$20,000. Eligible businesses can buy equipment related to their operations, and as long as each item is less than \$20,000, they can claim an immediate tax deduction. If you're ready to upgrade from a manual packing process to a semi, or fully automated process then perhaps this is now the right time. Please check our website www.venuspack.com.au or call us now on (03)9428-1652 to discuss your operational needs. Please seek independent tax advice for your business.

Now \$1,049

LOW PROFILE STRAPPING MACHINE VHPE10DL

The VHPE10DL Low Tabletop Strapping Machine is built lower to the ground to allow for easy strapping and movement of tall and heavier boxes on and off the table. This semi-automatic strapping machine takes 6, 9, 12 and 15.5mm PP strapping and uses convenient single phase power. It also comes with a strap length timer to pre-set strapping length and lockable castor wheels.

PALLET STRAPPING MACHINE VHPS14

Ideal for the strapping of pallets without the use of hand tools, the Venhardt VHPS14 Pallet Strapping Machine is easily moved from one pallet to the next, and conveniently operates from standard 240v mains power. The 1 metre strapping arm is wheeled through the foot of the pallet and strapping is manually fed over the pallet and back into the strapping machine to be tensioned, cut and sealed. Takes 12 – 15mm strapping. Maximum pallet width 1000mm.

~~Was \$2,982~~
Now \$1,800
