

VHPS502 PALLET STRAPPING MACHINE

PRODUCT DESCRIPTION

The VHPS502 provides an ergonomic and cost-effective solution for low volume vertical pallet strapping applications. It features a compact strapping head, direct drive technology with German-made DC motor, and electronic tension control. It eliminates the use of manual tools and dispensers, and is easily moved beside the load you want to strap, without moving the pallet. It provides a cost-effective, ergonomic solution for low volume vertical pallet strapping applications.

PRODUCT FEATURES

- Compact mechanical strapping head
- Electronic tension control
- Equipped with four castor wheels for effortless mobility
- Jog switch
- Suitable for lower height pallets
- Adjustable weld-cooling time
- Servicing and spare parts available
